

# Shot Wizard Gelatin Shot Mix Instructions

Note: Shot Wizard Gelatin is very high quality. Please follow directions as close as possible for best results.

## Instructions:

1. Pour shot flavor mix (1 Liter Bottle) into a gallon or larger container.
2. Add one liter or 34 ounces of hot water in with the shot flavor mix and stir. (The hotter the water the better)
3. Open gelatin packet (marked GELATIN) and slowly sprinkle contents into hot water/shot flavor mixture while stirring vigorously.
4. Stir until gelatin is completely dissolved. (Approximate mixing time 4-5 minutes or until dissolved completely)

Note: If small lumps of gelatin remain you may remove them without affecting the product.

Caution: If you remove large lumps or too much gelatin, product will not gel.

5. (Optional) Stir in 24 ounces of your favorite room temperature alcohol.
6. Pour finished gelatin shot mixture into containers of your choice. (Gelatin injectors or cups)
7. Place in refrigerator overnight or until set. Serve and Enjoy!

Makes: 128, 1 ounce gelatin shots or 384, 10ml injector shots.

### Recommended Alcohol Flavors:
